More than

400 Digital Talents & Expertise

DXⁱ Services

Specializing in **Data, Automate, Application, Solutioning & Digital Advisory**, we offer tailored solutions to meet the evolving digital needs of modern enterprises.

Case Study

PROBLEM STATEMENT

A major bank had a legacy system with many applications that are siloed, such as remittance, payments, markets, deposits, loans and data integration resulting in redundancies, inefficiencies and duplicated tasks.

DXⁱ SOLUTION

Braindige facilitated Fit and Gaps sessions to define business workflows, communicated them to the technical team and devised a training plan with end-to-end testing. We managed user checklist for Day 0 or Day 1 operations before production release and supported user inquiries thereafter.

TRANSFORM

The system was successfully launched in the anticipated countries, prompting our involvement in providing rollout support to additional countries. Customers have expressed satisfaction with the services and consultation offered.

DXⁱ Tools

Braindige mastered a diverse range of **low-code** and **no-code DXⁱ App development tools** such as **Decisions** and **UiPath**, demonstrating continuous growth aspiration and perseverance in staying at the forefront of technological advancements.

NO-CODE PLATFORM: DECISIONS

Decisions, one of our DXⁱ App development tools, is a no-code process automation platform designed to automate and accelerate any business process.

01

COMPREHENSIVE TOOL

Decisions merges AI tools, rules engines, workflow management, UX designing and more, helping to transform customer experiences, modernize legacy systems, and achieve automation goals much faster than traditional software development.

02

FLEXIBLE ARCHITECTURE & DATA STORAGE

Decisions has a flexible architecture that enables access via web, mobile, and API, with data storage options in SQL Server, PostgreSQL and more.

03

ADAPTABLE INTEGRATION & LICENSING OPTIONS

Integration with external systems is supported, and deployment flexibility extends to both cloud and on-premise environments. Licensing options are available in the form of subscriptions that are Cloud-based.

DXⁱ Apps

Leveraging the capabilities of low-code and no-code platforms, we have developed customized applications for various industries, enhancing their business operations for increased efficiency, productivity and expansion.

Rostering & Management

Developed for an elderly care home, incorporating rules engine that matches the residents with the appropriate caregiver.

Contract Management

Designed for a Financial Institution to automate their contract negotiation workflow.

Invoicing & Payment

Designed for a global educational institution to automatically extract relevant information for invoice processing from provided document text.

DXⁱ AI

In pursuit of our commitment to continually address critical industry demands, Braindige established U+ Plus, an AI startup dedicated to delivering customized AI transformative solutions and services.
